I really enjoy anything creative, art based, or puzzle-like; so learning to code has been a natural fit for me. Self-taught through The Odin Project's project-based curriculum, with 20+ shipped applications spanning relational database design, REST APIs, authentication, and React front ends. I bring 5+ years of professional client communication and fast-paced, detail-driven work from freelance and customer-facing roles.

01 — Technical Skills

Languages & Runtime: JavaScript (ES6+), HTML5, CSS3, Node.js

Frameworks & Templating: React, React Router, Vite, Webpack, Express, EJS

Database & Tools: PostgreSQL, Prisma, Neon, Vercel, Git, Jest, Vitest, ESLint, Cloudinary, Passport.js, JWT

02 — Featured Work

Hack the Planet — Full-Stack Messaging App

Feb 2026 – Mar 2026

Designed and built a full-stack messaging platform with JWT-based authentication, protected routes, and relational data modeling. Implemented RESTful APIs and client-side polling for near real-time message updates.

code github.com/MK-DLR/messaging-app live messaging-app-bice-nine.vercel.app/login

Object Recognition Protocol — Where's Waldo Game

Feb 2026

Built a full-stack interactive game with precise coordinate-based click detection, dynamic UI updates, and database-backed game logic for tracking player progress and results.

code github.com/MK-DLR/wheres-waldo live wheres-waldo-vert.vercel.app/

HerbTrack — Inventory Management App

Nov 2025

Built a full-stack medicinal plant inventory system with session-based authentication, role-based access control, relational database design, and full CRUD functionality.

code github.com/MK-DLR/inventory-app live inventory-app-e3zm.onrender.com/plants

Let's Play Battleship

Jul 2025 – Aug 2025

Developed a fully interactive Battleship game with modular vanilla JavaScript and DOM manipulation, including game state management and win-condition logic, using test-driven development.

code github.com/MK-DLR/battleship-project live mk-dlr.github.io/battleship-project/

03 — Additional Projects

- **Blog API** — RESTful blog API with role-based access control, admin-only content creation, and draft/publish workflows.
- **File Uploader App** — Secure file management system with per-user file/folder CRUD, admin-level access, and cloud storage integration.
- **Members Only App** — Members-only app with secure session management; registered members can post while visitors have read-only access.
- **Shopping Cart App** — React SPA shopping cart with dynamic product display, routing, component-based architecture, and frontend testing.

04 — Education

The Odin Project — Full Stack JavaScript Path

Jan 2025 – Jul 2026

Self-directed, project-based curriculum covering full-stack JavaScript development; completed 20+ applications from front-end fundamentals through deployed full-stack systems.

05 — Experience

Freelance Digital Artist · Self-Employed, Remote

Dec 2020 – Present

- Manage end-to-end client relationships for custom digital art and design commissions. Work includes reference gathering, revisions, and meeting delivery timelines.
- Maintain consistent, professional communication across concurrent projects, building a track record of repeat clients through reliability and clear expectation-setting.

Additional experience: Dog Handler/Feeder & Overnighter, The Bone Adventure (2018–2019, 2009–2011) · Barista & Coffee Master, Starbucks (2016–2018) · Pet Care Associate, PetSmart (2012–2017) — roles spanning customer service, team coordination, and fast-paced, detail-oriented work under time pressure.
